# Why Worry?

- A crisis is a sudden and unexpected event that threatens to **disrupt** an organization's operations and poses both a **financial** and **reputational threat**.
- Stakeholders – community members, employees, customers, suppliers and shareholders – compare **what they know** about an organization to some standard to determine whether or not an organization meets behavioral expectations.
- Crises create a need for information in order to ease uncertainty and anxiety
- The public does have a right to know. The news media and social media are the most common channels through which stakeholders **first learn** about a crisis.

# Food Worries...

## Technological

- Use of hormones in livestock
- Quality of food produced using intensive farming methods
- Use of antibiotics in livestock
- Safety of meat produced by intensive farming methods
- Genetically modified foods
- Food additives, preservatives
- Use of pesticides in food production; pesticide residue
- Bacteria; industry hygiene
- Animal welfare standards in food production

The CDC estimates that each year, “roughly one in six Americans gets sick, 128,000 are hospitalized, and 3,000 die from foodborne diseases.”

# Food Worries...

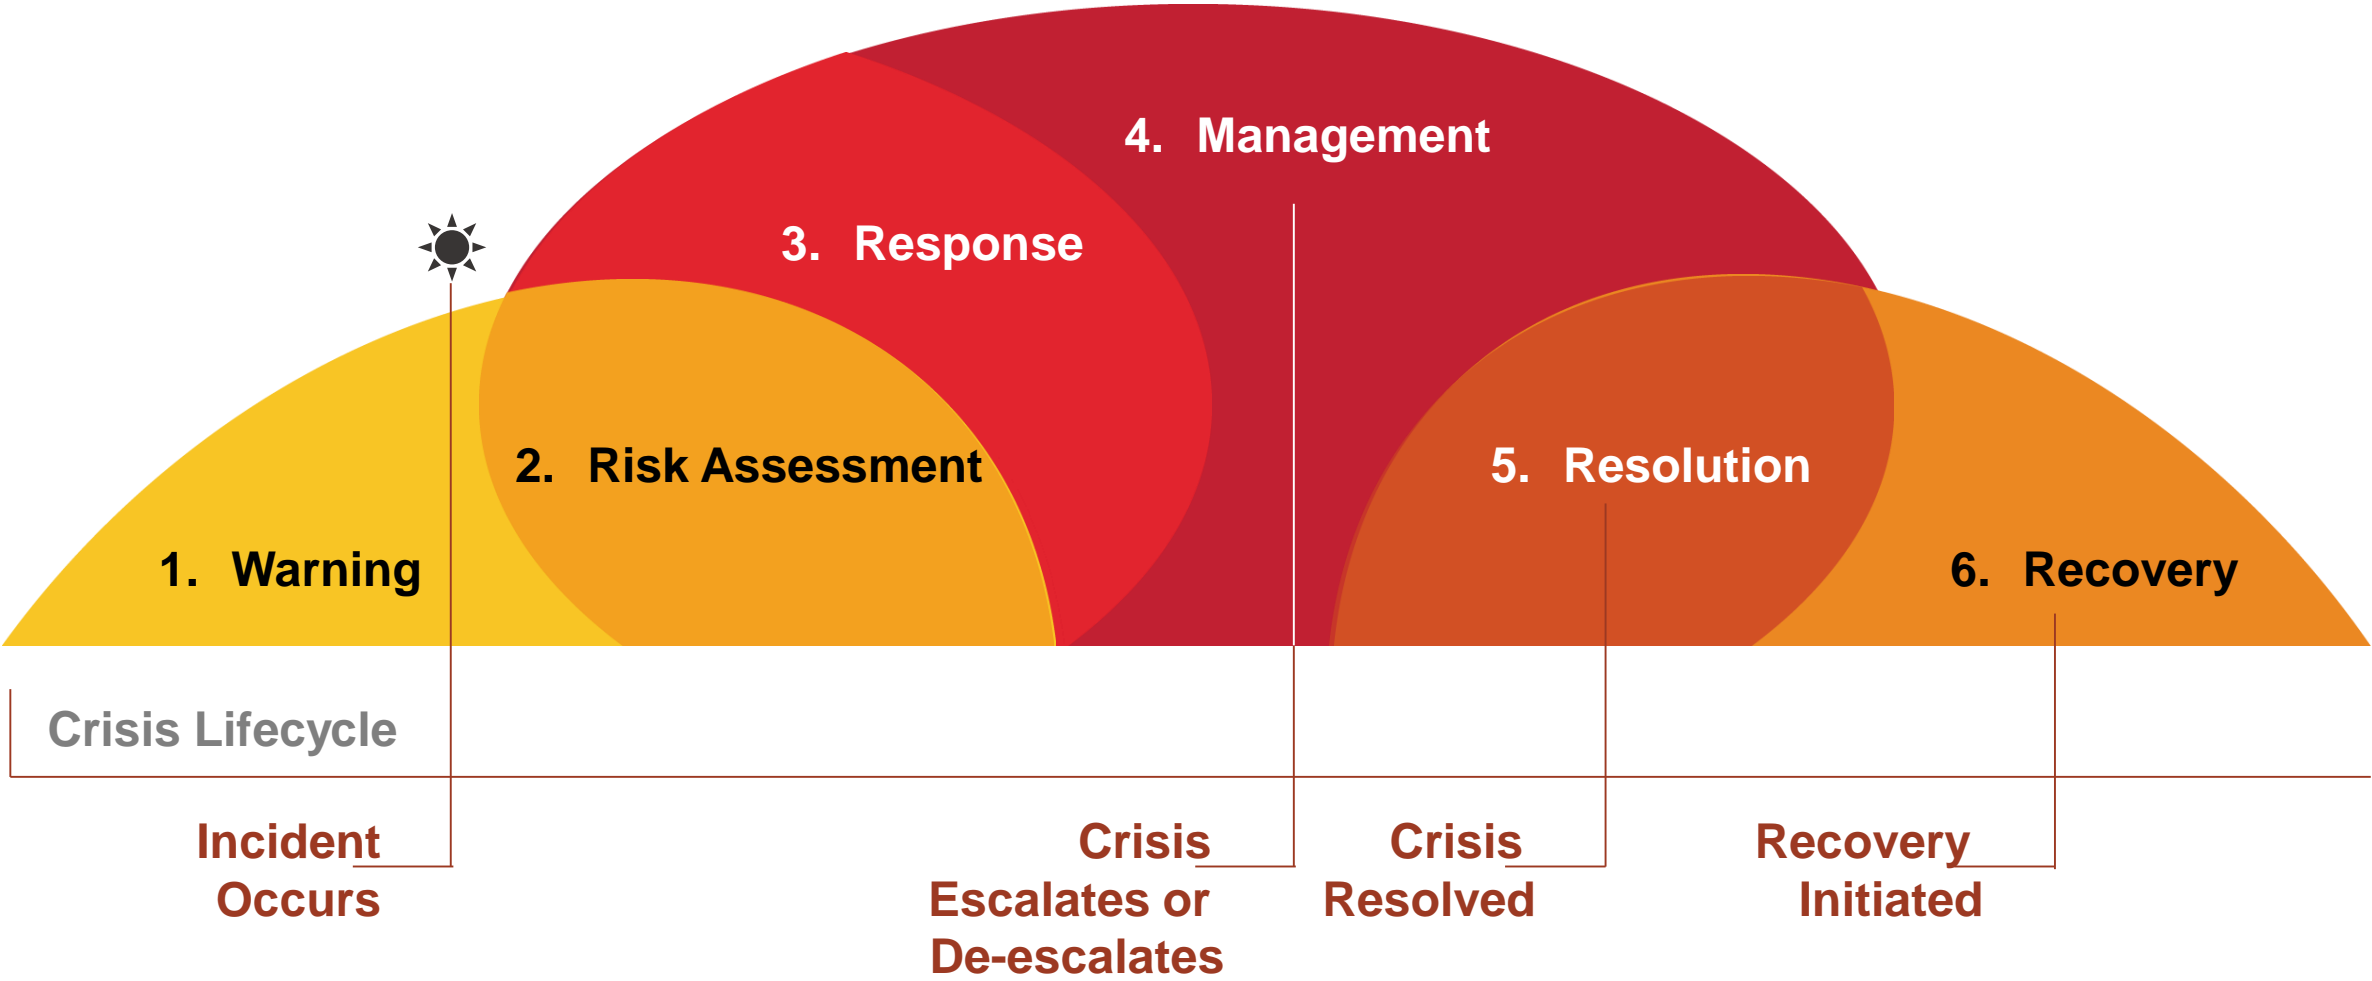

## Informational/Lifestyle

- Knowing what to do in the event of a food scare or recall
- Getting food poisoning
- Affordability of good quality food
- Erratic information about what foods are good for you
- Amount of fat in your diet
- Conflicting information on food safety, labeling
- Lack of information about food from the government

The U.S. Food & Drug Administration *Safety* site lists ~540 recalls, market withdrawals and safety alerts for 2016 (1.5 per day)

# Social Media Policy Assessment

	Policy Areas to be Considered
1	Legal restrictions (e.g. age limits)
2	Definition of 'troll' activity and how you'll manage it
3	Handling promotion of competitors or solicitation
4	Use of profanity or hate language (sexism, racism)
5	Criminal activity (e.g. fraud, libel, harassment, copyright)
6	Inappropriate content (e.g. violence, pornography)
7	Spam, click bait or propagation links from malware
8	Staff behaviors, confidentiality
9	Response time expectations
10	Contact details to redirect serious threats or issues

## Alert

Identify issues as early as possible before they escalate.

## Assess

Determine the severity of each issue, involved relevant stakeholders.

## Act

Resolve issues as efficiently as possible. REMEMBER... social media is an exchange forum. **MIA is not allowed.**
